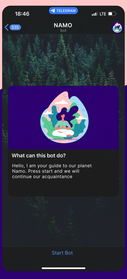
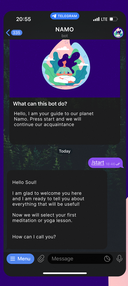
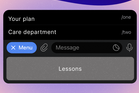
NAMO

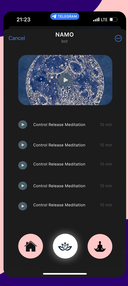
Motivational bot and built-in website in telegram including meditative and yoga practices





First, the bot will pick up the first meditation for you and it will be available for free. Then if you like it, you can go to the plan section in the menu and choose what you like





NFT in the form of metaphorical cards

Think about what excites you today. Stay a little quiet, breathe evenly and deeply. Focus on a relevant question or unresolved problem and choose one of the cards. Dont hesitate for a long time: open the card that you like.

Your card is "Abundance"

Flowers in an endless fragrant field symbolize your life
The more you invest resources in caring for your field so that it blooms, smells sweet and pleases you, the happier you will live your life

And now it's not just a card, it's the key with which you can practice meditation with us for a week and do yoga with experienced teachers!

Why we decided to use NFT?

- This is an alternative way to pay with cryptocurrency
- This is a good advertisement among the web 3 audience
- To use a neural network
- Thanks to these NFTs, a person will not only be able to access our application, but also get an answer from his subconscious to the question asked using a metaphorical card

Thank you
